EXAMINER'S AMENDMENT/REASONS FOR ALLOWANCE

1. Applicant's election without traverse of Species III (claims 6 and 19) in the reply filed on 30 May 2006 is acknowledged.

Examiner's Amendment

2. This application is in condition for allowance except for the presence of claims 1-5, 7-18 and 20-25 directed to Species non-elected without traverse. Accordingly, claims 1-5, 7-18 and 20-25 have been cancelled.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The prior art of record while generally showing SAW devices with reflectors weighted by apodization, does not show a device with "a balanced-to-unbalanced conversion function" and with first and second filter elements each having a first and a second reflector, wherein in the first and second surface acoustic wave filter elements "the first reflectors have the same structure, and the second reflectors have the same structure". The prior art being made of record by the Examiner is discussed below.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2817

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Takamine U.S. 7,015,776 does not qualify as prior art, but appears to be a related application with the reflectors of two SAW filters (see Figs. 25-35) weighted by apodization, but the reflectors in one filter are different from those in the other filter.

Tanaka U.S. 6,650,207 discloses two cascaded SAW filters (Fig.19) with reflectors weighted by apodization, but the first reflectors (on the left) are not the same and there is no balanced/unbalanced conversion.

Ruile et al. U.S. 5,621,364 generally discloses reflectors for SAW devices that are weighted by apodization, and JP 2000-196399 discloses a SAW device with reflectors that are weighted by apodization.
